Surveillance and Reconnaissance

CACI integrates surveillance and reconnaissance (S&R) technologies into platforms that enhance situational awareness, mobility, interoperability, and survivability. We deliver technology-agnostic platform integration tailored to the mission requirements of each customer. This involves developing and integrating state-of-the-art surveillance and reconnaissance sensors into the air and ground systems the mission requires, leveraging our mission-customized software and electronics. From design to deployment to maintenance, training, and product improvements, CACI provides full lifecycle support for reconnaissance and surveillance systems.

CACI
EVER VIGILANT

INFORMATION DEPLOYED. SOLUTIONS ADVANCED. MISSIONS ACCOMPLISHED.

Surveillance and Reconnaissance

Highlights

- Innovative, mission-driven, technology-focused approach to hardware integration
- Rapid prototyping, systems development, and quick reaction capabilities (QRC) addressing customer needs to operate in a global environment
- Capabilities for Low Rate Initial Production (LRIP)
- Advanced multi-and hyperspectral sensor integration testing and integration
- Program management that ensures efficient control of performance, schedule, and cost

Benefits

- Intimate understanding of intelligence, surveillance, and reconnaissance (ISR) tradecraft and technologies
- Cutting-edge technologies and capabilities applied to customer-specific missions
- Enhanced customer capabilities in the most rapid timeframe possible
- Processes tailored to the nature of the project and schedule and cost constraints

CACI provides full lifecycle support for several U.S. military surveillance and reconnaissance systems that detect, identify, evaluate, and engage enemy forces.

S&R Mission Support: CACI provides integration, development, and technical support services to advance intelligence, defense, and homeland security missions throughout the U.S. and around the world. We use system-of-systems engineering and integration, Agile development and deployment, and end-to-end lifecycle support to deliver net-centric solutions.

S&R Hardware Integration: We apply our disciplined methodologies, along with our deep product development and integration experience, to rapidly identify and implement innovative technological solutions. This includes proven experience implementing QRC on large-scale programs in response to urgent needs. We integrate hardware with a focus on sensor performance, user interfaces, interoperability, and environmental ruggedness.

MASINT: For more than 25 years, CACI has supported measurement and signature intelligence (MASINT) programs and systems. As one of the industry's leading sources of MASINT innovation, we support significant programs with a full spectrum of technology and analytic services.

Software Integration Labs: CACI maintains facilities to meet a broad spectrum of design, development, prototyping, and LRIP solutions in support of diverse ISR global requirements. We maintain facilities that enable advanced technology applications and integration, as well as QRC systems engineering support. We operate a facility that serves as a research and development incubator for CACI's intelligence, surveillance, and reconnaissance capabilities, and also enables customers and partners to develop their technologies in collaboration with military research labs.

INFORMATION DEPLOYED.
SOLUTIONS ADVANCED.
MISSIONS ACCOMPLISHED.

CACI provides information solutions and services in support of national security missions and government transformation for Intelligence, Defense, and Federal Civilian customers. CACI is a member of the Fortune 1000 Largest Companies, the Russell 2000 Index, and the S&P SmallCap600 Index. CACI's sustained commitment to ethics and integrity defines its corporate culture and drives its success. With approximately 18,600 employees worldwide, CACI provides dynamic career opportunities for military veterans and industry professionals to support the nation's most critical missions.
